Sequence Diagram: Digital Wallet Payment Flow

Core Operations: User Login, Balance Check, PIN Verification, Payment Processing & Receipt

Simplified Sequence Summary:

- **Step 1 (Auth):** User logs in → Wallet verifies credentials → Displays current balance.
- **Step 2 (Validation):** User enters payment amount → Server checks balance (prompts top-up if low).
- **Step 3 (PIN & Bank):** User enters secret PIN → Server processes payment via Bank Gateway.
- **Step 4 (Completion):** Balance deducted → Transaction saved → Digital receipt displayed.
